Technical University of Lodz International Faculty of Engineering (IFE)

Technical
University
of Lodz

INTERNATIONAL FACULTY OF ENGINEERING

Our mission is:

„...to educate professional engineers and managers, fluent in foreign languages, as well as with an ability to demonstrate the knowledge in science, engineering technology and business...”

Technical
University
of Lodz

INTERNATIONAL FACULTY OF ENGINEERING

- The International Faculty of Engineering (**IFE**) is a TUL's unit that offers programmes held in English and French, which is a unique offer among studies provided by technical universities in Poland.
 - 1100 students
 - 250 foreign students per year

Technical
University
of Lodz

Why is IFE unique?

- **European Project Semester (EPS)** under which students of various engineering and business programmes work in teams on multidisciplinary projects. These projects are carefully selected to match their specialities and capabilities as well as to develop their intercultural communication and teamwork skills.
- **Problem Based Learning (PBL)** - a student-centred pedagogical method that allows students to gain competences in given academic fields through solving particular problems while working on a team project. Compared with a traditional educational model, PBL promotes a more independent and creative approach to learning.

Technical
University
of Lodz

Why is IFE unique?

- **Mobility Semester** for all third-year students giving them the opportunity to study at more than 100 universities in 15 countries under the Erasmus programme. The Faculty also accepts annually about 250 students from universities across Europe.
- **Double Diplomas** in partnership with leading British and French universities.

INTERNATIONAL FACULTY OF ENGINEERING

■ BSc programmes in English (9)

- Mechanical Engineering and Applied Computer Science
- Telecommunications and Computer Science
- Business and Technology
- Biotechnology
- Computer Science
- Biomedical Engineering
- Science and Technology
- Information Technology
- Architecture Engineering

■ BSc programmes in French (1)

- Gestion et Technologie

Technical
University
of Lodz

International cooperation

■ European Partners

- Over 100 universities across 15 countries
- Agreements on double diploma with:
 - France (ENSAM, ESC Chambery, Group Sup de Co La Rochelle)
 - Great Britain (Coventry University)

■ American partners

- University of Kansas
- University of Houston-Downtown

Technical
University
of Lodz

European project semester

- Mainly for third year Bachelor students
- Project based learning on integrated engineering and business projects
- Work in multi-disciplinary and multi-national teams
- Cooperating and negotiating with students from different backgrounds
- Focus on process and product
- Length: one semester, 30 ECTS credits

Technical
University
of Lodz

European project semester

- International teams of 4-5
- Academic and industrial research projects
- Projects selected from the framework of programmes offered at IFE
- No tuition fee
- Language of instruction: English
- Competence, creativity and responsibility

Technical
University
of Lodz

Costs of living in Łódź

- The daily necessities are relatively inexpensive when compared to American standards.

- Approximate prices:

■ accommodation in dormitories	100\$	
■ lunch in student canteen		3\$
■ lunch outside Campus	6-9\$	
■ single student bus ticket	0,5\$

Engineering InFEction

- *Poland is a fast developing country and Lodz campus, where we live and study, is a place that offers a lot of valuable opportunities. The Erasmus Students Service is excellent here – local students are very hospitable and do their best to facilitate our integration into the new environment.*

Auxane Chalin (Sup de Co la Rochelle)

- *IFE offers a chance to participate in one-semester EPS programme, based on an interdisciplinary project in international teams. This is a very good way to develop skills needed in individual as well as group work. In my opinion this project institutes a very useful bridge between the student and the professional environment.*

Jean Russoux (ENSAM)
