

<b>Course code</b>																																	
<b>Type and description</b>	EC – elective subjects from the discipline of Material Engineering																																
<b>ECTS credit</b>	1																																
<b>Course name</b>	Textile mechanics																																
<b>Course name in Polish</b>	Mechanika tekstyliów																																
<b>Language of instruction</b>	English																																
<b>Course level</b>	8 PRK																																
<b>Course coordinator</b>	prof. dr hab. inż. Ryszard Korycki																																
<b>Course instructors</b>	prof. dr hab. inż. Ryszard Korycki																																
<b>Delivery methods and course duration</b>	<table border="1"> <thead> <tr> <th></th> <th>Lecture</th> <th>Tutorials</th> <th>Laboratory</th> <th>Project</th> <th>Seminar</th> <th>Other</th> <th>Total of teaching hours during semester</th> </tr> </thead> <tbody> <tr> <td>Contact hours</td> <td>0</td> <td>0</td> <td>0</td> <td>5</td> <td>0</td> <td>0</td> <td>5</td> </tr> <tr> <td>E-learning</td> <td>no</td> <td>no</td> <td>no</td> <td>no</td> <td>no</td> <td>no</td> <td>no</td> </tr> <tr> <td>Assessment criteria (weightage)</td> <td>0</td> <td>0</td> <td>0</td> <td>100%</td> <td>0</td> <td>0</td> <td>100%</td> </tr> </tbody> </table>		Lecture	Tutorials	Laboratory	Project	Seminar	Other	Total of teaching hours during semester	Contact hours	0	0	0	5	0	0	5	E-learning	no	no	no	no	no	no	no	Assessment criteria (weightage)	0	0	0	100%	0	0	100%

<b>Course objective</b>	The course objective is to acquire the knowledge concerning the basic problems of textile mechanics.																																
<b>Learning outcomes</b>	<p>After the finished course the doctoral student/postgraduate can formulate the problem, determine the model and solve the selected project task concerning the textile mechanics.</p> <p>Effects:</p> <p><i>Knowledge:</i></p> <ul style="list-style-type: none"> <li>• <i>Zakres i głębia – kompletność perspektywy poznawczej i zależności – p.3.</i></li> </ul> <p><i>Skills:</i></p> <ul style="list-style-type: none"> <li>• <i>Wykorzystanie wiedzy – rozwiązywane problemy i wykonywane zadania – p.1.</i></li> <li>• <i>Komunikowanie się – odbieranie i tworzenie wypowiedzi, upowszechnianie wiedzy w środowisku naukowym i posługiwanie się językiem obcym – p.1.</i></li> <li>• <i>Organizacja pracy – planowanie i praca zespołowa – p.1.</i></li> </ul>																																
<b>Assessment methods</b>	<p>Presentation of the project.</p> <p>The final grade is a grade of the result of realized project - 100%</p>																																
<b>Prerequisites</b>	None																																
<b>Course content with delivery methods</b>	<ol style="list-style-type: none"> <li>1. Basic problems of strength of materials: stresses, displacements, strains.</li> <li>2. Stress-strain diagram during the tension.</li> <li>3. Modeling of yarns and linear textile structures as elastic bodies.</li> <li>4. Tension of yarns, calculation principle, admissible stresses. Strain, energy of strain, diagram.</li> <li>5. Stresses in inclined section. Unidirectional tension. Mohr's circle of inertia.</li> <li>6. Statically indeterminate systems, basic cases.</li> <li>7. Rheological state equations. Rheological models – characteristic, state equations.</li> <li>8. Heat. Basic laws and description of the phenomenon. Methods of heat exchange and laws describing the problem. Differential description of heat transport.</li> </ol>																																

	9. Heat transfer in textile structures, heat balance, differential heat equation. Uniqueness of solutions, boundary and initial conditions.
